

CME Group and Commodity Club Webinar

GOLD INVESTING FROM AN ESG AND CLIMATE PERSPECTIVE

CME Group, in collaboration with Commodity Club Switzerland, invites you to attend a webinar focusing on the ESG and climate-related aspects of gold investing on Tuesday, 25 May.

As sustainability aspects continue to gain importance, there is a need for a framework to assess the sustainability of the gold value chain, especially for institutional investors.

We will be joined by experts **Sakhila Mirza**, Board Director and General Counsel at the **London Bullion Market Association** and **John Mulligan**, Director, Market Relations and Climate Change Lead at **The World Gold Council** to explore gold investing from an ESG and climate perspective.

During the event we will cover the most relevant industry standards, responsible sourcing guidelines, and the impact from a climate perspective.

Register to attend using the button below. Further instructions on joining this online event will be provided following registration.

If you have any questions, please email events@cmegroup.com.
