The Role of Cobalt and Lithium in Energy Transition

WisdomTree, Commodity Club, CME Group and Fastmarkets invite you to attend an online event on Wednesday, 4th October on 'The Role of Cobalt and Lithium in Energy Transition'.

WisdomTree believes that both **cobalt and lithium are essential materials needed for the Energy Transition**, potentially seeing some of the **highest demand growth of all transition materials**. WisdomTree is the first product provider to offer exposure to the cobalt and lithium futures markets in an Exchange Traded Commodity (ETC) wrapper via its flagship WisdomTree Energy Transition ETC and WisdomTree Battery Metals ETC products.

The session will feature:

- Nitesh Shah, Head of Commodities & Macroeconomic Research, Europe, WisdomTree
- Alexander Peters, Board Member, Commodity Club Switzerland
- Ian Caton, Director, Metals Products, CME Group
- Justin Yang, Strategic Markets Editor, Energy Transition, Fastmarkets

Together, they will highlight:

- Commodity Club Switzerland's welcome & introduction - its mission, role and an introduction to the topics of the session
- WisdomTree's **Energy Transition ETC and Battery Metals ETC products**
- CME Group's rapidly **expanding Battery Metal markets**, which are the main pools of liquidity for managing Cobalt and Lithium price exposure
- Underlying spot assessments published by Fastmarkets, which the futures contracts converge to at final settlement

The session will be recorded and a link to the recording will be shared post-event, so if you are unable to attend, we still encourage you to register to receive the recording.

This online event is approved for 0.75 hours CPD as accredited by The CPD Certification Service.
